

V-ASSURE

Simplifying Validation and Testing for Veeva Vault

Reaching New Heights of Digital Excellence in Life Sciences with Smart Solutions

As the industry continues to accelerate at a rapid rate of innovation, your GxP systems need to keep pace to reach digital excellence.

Your investment in best-of-breed Veeva Vault allows your business the ability to scale like never before. However, subsequent validation and testing cycles are still needed to meet compliance. With 3x platform releases per year from Veeva, in addition to the three to five functional releases required within your own system's environment, your business starts to lose valuable time and the critical resources needed to complete daily processes.

Spotline's V-Assure solution, designed for Veeva Vault, allows your team to focus more on business priorities and less on system maintenance and stability. Take advantage of new features, meet GxP compliance standards, and bring your products to market faster to improve patient outcomes across the globe.

What is Spotline V-Assure?

Spotline's V-Assure is a solution that takes the repetitive complexity out of your manual testing cycles, enabling your business to dramatically speed up the adoption of new Veeva Vault Platform features and functionality.

With continuous platform enhancements, customers will need to validate Veeva Vault's new releases multiple times per year – consuming valuable time and resources. Spotline's V-Assure streamlines testing and greatly improves efficiencies so your team can meet critical milestones.

Significantly Reduce Testing Cycle Times From Weeks to Just Days

Accelerate

Built specifically to accelerate the adoption of new Veeva Vault releases.

Cloud or On-Prem

Whether your business hosts everything in an in-house environment or in the cloud (AWS, Azure, GCP), our V-Assure solution is adaptable to your unique business needs.

Minimize Costs

Save valuable resources and eliminate the need to purchase expensive Testing platform licenses that will not serve your business needs with Veeva Vault.

Save Time

Experience a reduction in cycle times of up to 80%, saving teams two to eight weeks of critical time per release cycle.

Increase Productivity

V-Assure limits validation risks by identifying issues earlier in the QA process.

Tailored for Your Testing Environment

Utilize the option to run regression or the full test suite depending on your specific frameworks and testing environment.

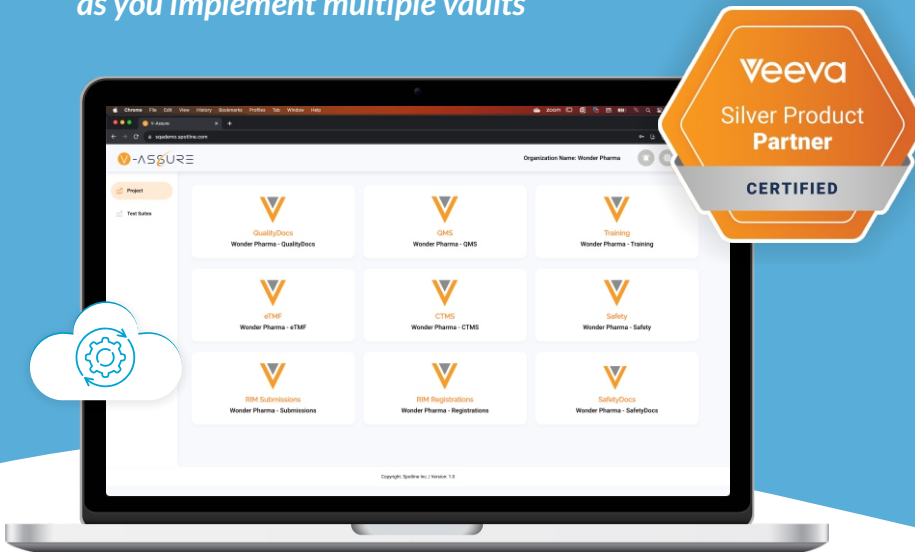

Pre-configured Test Cases for Multi-Vault Environments

Pre-loaded test cases out-of-the-box for multiple Vaults to streamline Validation processes.

Gain End-to-End Visibility Throughout the Entire Testing Cycle

An intelligent solution that scales with your business as you implement multiple vaults

“
Spotline provided the knowledge and expertise we needed to advance our Vault QualityDocs project without setbacks. Their V-Assure Automated Testing solution for Veeva has notably enhanced our operations.”

- Fortune 500 Life Sciences Company

Bringing Control and Efficiency to Testing and Validation

Rely on our proven approach and methodology for end-to-end Software and Quality Assurance Testing Services for your single or multi-vault environment. We leverage our industry and technology best practices to support your efforts for continuous deployment and continuous integration (CI/CD) including API management. With our early access to Veeva Vault Platform releases, our experts will help you identify and select the right tests cases, provide automation assistance, and get you set up with unique integrations and customizations. This includes smoke test, basic acceptance test or regression test. Speed up and simply validation processes so you can focus on achieving positive patient outcomes.

Leverage Our Expertise in Life Sciences Cloud Solutions & Services

With over 20 years of expertise delivering best-in-class solutions and services in life sciences, biotech, and pharmaceutical, our team of Veeva Vault certified experts is focused on innovating and delivering reliable solutions for Quality, R&D, Clinical Operations, Safety, and Commercial.
